

RATIONALISED SCHEMES OF WORK

MATHEMATICS

GRADE 7

TERM 1 2026

TEACHER'S NAME.....

TSC NUMBER.....

SCHOOL.....

We ek	LS N	strand	Sub- strand	Specific Learning Outcomes	Key Inquiry Question(s)	Learning Experiences	Learning Resources	Assessment Methods	Ref 1
1	1	NUMBERS	Whole Numbers Place Value	By the end of the lesson the learner should be able to: a) Discuss the place value chart. b) Prepare a place value chart. c) Appreciate use of place value in real life situations.	1. Why do we write numbers in words and/or symbols?	The learner is guided to: • identify and write place value of digits using place value apparatus • prepare and use place value charts to round off numbers	Place value apparatus, Number charts, Number cards, Multiplication table Smart Minds T.G. Pg. 21-23 Smart Minds P.B. Pg.1-2	Class activities Class written tests Out of school/home assignments	
	2		Place Value	By the end of the lesson the learner should be able to: a) Identify and write place value of digits using place value apparatus. b) use place value of digits up to hundreds of millions in real life c) Appreciate use of place value in real life situations.	1. Why do we write numbers in words and/or symbols?	The learner is guided to: • identify and write place value of digits using place value apparatus	Place value apparatus, Number charts, Number cards, Multiplication table Smart Minds T.G. Pg. 21-23 Smart Minds P.B. Pg.1-2	Class activities Class written tests Out of school/home assignments	
	3		Total Value	By the end of the lesson the learner should be able to: a) Discuss ways of getting total value of digits in a number. b) use IT devices for learning more on total value for enjoyment c) Appreciate use of total value in real life situations.	1. Why do we write numbers in words and/or symbols? 2. Where do we write numbers in words or symbols?	The learner is guided to: • identify total value of digits using place value apparatus	Place value apparatus, Number charts, Number cards, Multiplication table Smart Minds T.G. Pg. 23-24	Class activities Class written tests Out of school/home assignments	

							Smart Minds P.B. Pg.34		
	4		Total Value	By the end of the lesson the learner should be able to: a) Explain the relationship between place value and total value of a digit in a number. b) use total value of digits up to hundreds of millions in real life. c) Appreciate use of total value in real life situations.	1. Why do we write numbers in words and/or symbols?	The learner is guided to: • identify total value of digits using place value apparatus	Place value apparatus, Number charts, Number cards, Multiplication table Smart Minds T.G. Pg. 23-24 Smart Minds P.B. Pg.34	Class activities Class written tests Out of school/home assignments	

	5		Total Value	By the end of the lesson the learner should be able to: a) Explain the relationship between place value and total value of a digit in a number. b) use total value of digits up to hundreds of millions in real life. c) Appreciate use of total value in real life situations.	2. Where do we write numbers in words or symbols? 3. Why do we round off numbers in real life situations?	The learner is guided to: • identify total value of digits using place value apparatus	Place value apparatus, Number charts, Number cards, Multiplication table Smart Minds T.G. Pg. 23-24 Smart Minds P.B. Pg.34	Class activities Class written tests Out of school/home assignments	
--	---	--	------------------------	--	--	---	---	--	--

[illegible]

	4		<i>Rounding off numbers to the nearest hundreds of millions</i>	By the end of the lesson the learner should be able to: a) round off numbers up to the nearest hundreds of millions in real life situations. b) Use It devices to learn more about rounding off numbers. c) Appreciate use of numbers in real life situations.	Why do we round off numbers in real life situations?	The learner is guided to: • read and write numbers in words on number cards or charts and practice writing dummy cheques for different sums of money	Place value apparatus, Number charts, Number cards, Multiplication table <i>Smart Minds T.G. Pg. 26 Smart Minds P.B. Pg. 79</i>	Class activities Class written tests Out of school/home assignments	
	5		<i>Natural Numbers – Even Numbers</i>	By the end of the lesson the learner should be able to: a) classify natural numbers as even in different situations b) use IT devices for learning more on even numbers and for enjoyment. c) Appreciate use of numbers in real life situations.	What are even numbers:?	The learner is guided to: • prepare and use place value charts to round off numbers	Place value apparatus, Number charts, Number cards, Multiplication table <i>Smart Minds T.G. Pg. 27 Smart Minds P.B. Pg. 910</i>	Class activities Class written tests Out of school/home assignments	
3	1		<i>Odd numbers</i>	By the end of the lesson the learner should be able to: a) classify natural numbers as odd in different situations b) use IT devices for learning more on odd numbers and for enjoyment c) Appreciate use of numbers in real life situations.	what are odd numbers?	The learner is guided to: • prepare and use place value charts to round off numbers	Place value apparatus, Number charts, Number cards, Multiplication table <i>Smart Minds T.G. Pg. 27-28 Smart Minds P.B. Pg. 11</i>	Class activities Class written tests Out of school/home assignments	

	2		Prime numbers	By the end of the lesson the learner should be able to: a) classify natural numbers as prime in different situations b) use IT devices for learning more on prime numbers and for enjoyment. c) Appreciate use of numbers in real life situations.	what are prime numbers?	The learner is guided to: • prepare and use place value charts to round off numbers	Place value apparatus, Number charts, Number cards, Multiplication table Smart Minds T.G. Pg. 28 Smart Minds P.B. Pg. 12	Class activities Class written tests Out of school/home assignments	

	3		Operation on whole numbers - addition	By the end of the lesson the learner should be able to: a) Add numbers in different situation. b) apply operations of whole numbers in real life situations c) develop curiosity in learning more about addition.	How do we add numbers?	The learner is guided to: • play a number game, make number cards, sort and classify numbers according to those that are even.	Place value apparatus, Number charts, Number cards, Multiplication table Smart Minds T.G. Pg. 28 Smart Minds P.B. Pg. 13-14	Class activities Class written tests Out of school/home assignments	
	4		Subtraction	By the end of the lesson the learner should be able to: a) Subtract numbers in different situation. b) apply operations of whole numbers in real life situations c) develop curiosity in learning more about number subtraction.	How do we subtract numbers?	The learner is guided to: • play a number game, make number cards, sort and classify numbers according to those that are odd.	Place value apparatus, Number charts, Number cards, Multiplication table Smart Minds T.G. Pg. 29 Smart Minds P.B. Pg. 14-15	Class activities Class written tests Out of school/home assignments	

	5		Multiplication	By the end of the lesson the learner should be able to: a) Multiply numbers in different situation. b) apply operations of whole numbers in real life situations c) develop curiosity in learning more about number subtraction.	How do we multiply numbers?	The learner is guided to: • play a number game, make number cards, sort and classify numbers according to those that are prime.	Place value apparatus, Number charts, Number cards, Multiplication table Smart Minds T.G. Pg. 29 Smart Minds P.B. Pg. 15-16	Class activities Class written tests Out of school/home assignments	
4	1		Division	By the end of the lesson the learner should be able to: a) Divide numbers in different situation. b) apply operations of whole numbers in real life situations c) develop curiosity in learning more about number subtraction.	How do we divide numbers?	The learner is guided to: • work out or perform 2, 3 or more combined operations in the correct order using digital devices	Place value apparatus, Number charts, Number cards, Multiplication table Smart Minds T.G. Pg. 29-30 Smart Minds P.B. Pg. 16-17	Class activities Class written tests Out of school/home assignments	
	2		Combined operations	By the end of the lesson the learner should be able to: a) Identify and work out sums involving combined operations. b) apply operations of whole numbers in real life situations c) develop curiosity in learning more about combined operations.	How do we perform mixed operations?	The learner is guided to: • work out or perform 2, 3 or more combined operations in the correct order using digital devices	Place value apparatus, Number charts, Number cards, Multiplication table Smart Minds T.G. Pg. 30 Smart Minds P.B. Pg. 17-18	Class activities Class written tests Out of school/home assignments	

	3		Number sequence	By the end of the lesson the learner should be able to: a) identify number sequence in different situations b) create number sequence for playing number games c) develop curiosity in learning more about number sequence	How do we create number sequence?	The learner is guided to: ● Play games of creating number puzzles that involve number sequences using IT devices or other materials. ● identify the number patterns to work out number sequences	Place value apparatus, Number charts, Number cards, Multiplication table Smart Minds T.G. Pg. 30 Smart Minds P.B. Pg. 19	Class activities Class written tests Out of school/home assignments	
	4		Creating number sequence	By the end of the lesson the learner should be able to: a) identify number sequence in different situations b) create number sequence for playing number games c) develop curiosity in learning more about number sequence	How do we create number sequence?	The learner is guided to: ● Play games of creating number puzzles that involve number sequences using IT devices or other materials. ● identify the number patterns to work out number sequences	Place value apparatus, Number charts, Number cards, Multiplication table Smart Minds T.G. Pg. 31-32 Smart Minds P.B. Pg. 20	Class activities Class written tests Out of school/home assignments	
	5		Creating number sequence	By the end of the lesson the learner should be able to: a) identify number sequence in different situations b) create number sequence for playing number games c) develop curiosity in learning more about number sequence	How do we create number sequence?	The learner is guided to: ● Play games of creating number puzzles that involve number sequences using IT devices or other materials.	Place value apparatus, Number charts, Number cards, Multiplication table Smart Minds T.G. Pg. 31-32 Smart Minds P.B. Pg. 20	Class activities Class written tests Out of school/home assignments	

5	1	Factors	<i>Divisibility test of 2,3</i>	By the end of the lesson the learner should be able to: a) test divisibility of numbers by 2, 3 in different situations b) use IT devices for learning more on divisibility and for enjoyment c) Reflect on use of divisibility test in real life situations.	How do we use factors in day to day activities?	The learner is guided to: ● determine divisibility of numbers using regrouping and divisibility rule work sheets ● use IT to access factors of numbers including songs/poems or games on divisibility tests	Multiplication tables <i>Smart Minds T.G. Pg. 33-34</i> <i>Smart Minds P.B. Pg. 20-22</i>	Class activities Class written tests Out of school/home assignments	

	2		<i>Divisibility test 4,5</i>	By the end of the lesson the learner should be able to: a) test divisibility of numbers by 4, 5 in different situations. b) use IT devices for learning more on divisibility and for enjoyment. c) Reflect on use of divisibility test in real life situations.	How do we use factors in day to day activities?	The learner is guided to: ● determine divisibility of numbers using regrouping and divisibility rule work sheets ● use IT to access factors of numbers including songs/poems or games on divisibility tests	Multiplication tables <i>Smart Minds T.G. Pg. 34-35</i> <i>Smart Minds P.B. Pg. 23-24</i>	Class activities Class written tests Out of school/home assignments	
	3		<i>Divisibility test 6,8</i>	By the end of the lesson the learner should be able to: a) test divisibility of numbers by 6, 8 in different situations. b) use IT devices for learning more on divisibility and for enjoyment. c) Reflect on use of divisibility test in real life situations.	How do we use factors in day to day activities?	The learner is guided to: ● determine divisibility of numbers using regrouping and divisibility rule work sheets ● use IT to access factors of numbers including songs/poems or games on	Multiplication tables <i>Smart Minds T.G. Pg. 35-36</i> <i>Smart Minds P.B. Pg. 25-26</i>	Class activities Class written tests Out of school/home assignments	

[illegible]

6	1		Greatest common divisor	By the end of the lesson the learner should be able to: - work out the Greatest Common Divisor (GCD) of numbers by factor method in different situations. - use IT devices for learning more on GCD for enjoyment. - Reflect on use of GCD in real life situations.	How do we apply the GCD in day to day activities?	The learner is guided to: use factors to determine the GCD using number cards or charts	Multiplication tables Smart Minds T.G. Pg. 39 Smart Minds P.B. Pg. 33-34	Class activities Class written tests Out of school/home assignments	
	2		least common multiple	By the end of the lesson the learner should be able to: - work out the Least Common Multiples (LCM) of numbers by factor method in different situations - apply the Greatest Common Divisor (GCD) and the Least Common Multiples (LCM) in real life situations. - Reflect on use of LCM in real life situations.	How do we apply the LCM in day to day activities?	The learner is guided to: use factors to determine the LCM using number cards or charts	Multiplication tables Smart Minds T.G. Pg. 39-40 Smart Minds P.B. Pg. 34-35	Class activities Class written tests Out of school/home assignments	
	3	Fractions	comparing fractions – arranging in ascending and descending order	By the end of the lesson the learner should be able to: - compare fractions in different situations. - use IT devices for learning more on fractions and for enjoyment. - Recognize use of fractions in real life situations.	Where do we use fractions in daily activities?	The learner is guided to: - discuss and arrange fractions in increasing and decreasing order using different strategies - arrange fractions in ascending or descending order using fraction cards	Multiplication tables Smart Minds T.G. Pg. 41-43 Smart Minds P.B. Pg. 36-40	Class activities Class written tests Out of school/home assignments	

	4		<i>addition proper and mixed fractions</i>	By the end of the lesson the learner should be able to: a) add fractions in different situations b) use IT devices to add fractions and for enjoyment. c) Recognize use of fractions in real life situations.	1. How do we use fractions in daily activities?	The learner is guided to: • add fractions in cut outs, cards, charts and concrete objects	Multiplication tables <i>Smart Minds T.G. Pg. 43-44</i> <i>Smart Minds P.B. Pg. 40-42</i>	Class activities Class written tests Out of school/home assignments	

	5		<i>subtraction of proper and mixed fractions</i>	By the end of the lesson the learner should be able to: a) subtract fractions in different situations b) Apply subtraction of fractions in real life. c) Recognize use of fractions in real life situations.	1. How do we use fractions in daily activities? 2. Where do we use fractions in daily activities?	The learner is guided to: • subtract fractions in cut outs, cards, charts and concrete objects	Multiplication tables <i>Smart Minds T.G. Pg. 44-45</i> <i>Smart Minds P.B. Pg. 42-44</i>	Class activities Class written tests Out of school/home assignments	
7	1		<i>multiplication of fractions (fraction by a whole number)</i>	By the end of the lesson the learner should be able to: a) multiply fractions by a whole number, fraction and a mixed number in real life situations. b) Apply multiplication of fractions in real life. c) develop curiosity in multiplying fractions	1. How do we use fractions in daily activities? 2. Where do we use fractions in daily activities?	The learner is guided to: • multiply fractions in cut outs, cards, charts and models	Multiplication tables <i>Smart Minds T.G. Pg. 45-46</i> <i>Smart Minds P.B. Pg. 44-47</i>	Class activities Class written tests Out of school/home assignments	

	2		multiplication of fractions (fraction by a fraction and mixed number)	By the end of the lesson the learner should be able to: a) multiply fractions by a whole number, fraction and a mixed number in real life situations. b) Apply multiplication of fractions in real life. c) develop curiosity in multiplying fractions	1. How do we use fractions in daily activities? 2. Where do we use fractions in daily activities?	The learner is guided to: • multiply fractions in cut outs, cards, charts and models	Multiplication tables Smart Minds T.G. Pg. 45-46 Smart Minds P.B. Pg. 44-47	Class activities Class written tests Out of school/home assignments	
	3		reciprocals of fractions	By the end of the lesson the learner should be able to: a) identify the reciprocals of fractions in different situations. b) use reciprocals of fractions in real life. c) develop curiosity in reciprocals of fractions	Where do we use fractions in daily activities?	The learner is guided to: • use flip cards to discuss reciprocals	Multiplication tables Smart Minds T.G. Pg. 47 Smart Minds P.B. Pg. 48	Class activities Class written tests Out of school/home assignments	

	4		division of fractions	By the end of the lesson the learner should be able to: a) divide fractions by a whole number, fraction and a mixed fraction in real life situations b) use IT devices for learning more on division of fractions and for enjoyment. c) Recognize use of fractions in real life situations.	1. How do we use fractions in daily activities? 2. Where do we use fractions in daily activities?	The learner is guided to: • divide fractions in cut outs, cards, charts and models	Multiplication tables Smart Minds T.G. Pg. 47-49 Smart Minds P.B. Pg. 49-53	Class activities Class written tests Out of school/home assignments	
--	---	--	------------------------------	--	--	---	---	--	--

	5		division of whole numbers by a fraction	By the end of the lesson the learner should be able to: a) divide a whole number by fractions in different situations. b) make cards that involve fractions. c) Recognize use of fractions in real life situations.	Where do we use fractions in daily activities?	The learner is guided to: • divide fractions in cut outs, cards, charts and models • use IT devices to work out operations of fractions.	Multiplication tables Smart Minds T.G. Pg. 47-49 Smart Minds P.B. Pg. 49-53	Class activities Class written tests Out of school/home assignments	
8	1		number sequence	By the end of the lesson the learner should be able to: a) identify number sequence involving fractions in different situations. b) make cards involving number sequence of fractions c) Recognize use of fractions in real life situations.	How do we use fractions in daily activities?	The learner is guided to: • play games of creating number puzzles that involve fractions number sequences using IT devices or other materials • create a fraction sequence game that can be used for play and learning	Multiplication tables Smart Minds T.G. Pg. 50 Smart Minds P.B. Pg. 54-55	Class activities Class written tests Out of school/home assignments	
	2	Decimals	place value of digits in decimals	By the end of the lesson the learner should be able to: a) identify the place value of digits in decimals in real life b) use IT devices for learning more on decimals and for enjoyment. c) Recognize use of decimals in real life situations.	1. Where are decimals applicable in real life? 2. How do you use decimals in daily activities?	The learner is guided to: • discuss, state and use the place value of decimals using place value apparatus and worksheets	Equivalent fraction board, Circular and Rectangular cut outs, Counters Smart Minds T.G. Pg. 51-52 Smart Minds P.B. Pg. 56-57	Class activities Class written tests Out of school/home assignments	

	3		total value of digits in decimals	By the end of the lesson the learner should be able to: a) identify the total value of digits in decimals in real life. b) use IT devices for learning more on decimals and for enjoyment. c) Recognize use of decimals in real life situations.	1. Where are decimals applicable in real life? 2. How do you use decimals in daily activities?	The learner is guided to: • discuss, state total value of decimals using place value apparatus and worksheets	Equivalent fraction board, Circular and Rectangular cut outs, Counters Smart Minds T.G. Pg. 53 Smart Minds P.B. Pg. 58	Class activities Class written tests Out of school/home assignments	
	4-5	Half Term							
9	1		multiplication of decimals by whole numbers	By the end of the lesson the learner should be able to: a) multiply decimals by a whole number in real life situations. b) use IT devices for learning more on decimals and for enjoyment. c) Recognize use of decimals in real life situations.	1. Where are decimals applicable in real life? 2. How do you use decimals in daily activities?	The learner is guided to: • multiply decimals using cut outs, cards, charts and models • play games involving multiplication of decimals. • use calculators and other IT devices to work out operations of decimals.	Equivalent fraction board, Circular and Rectangular cut outs, Counters Smart Minds T.G. Pg. 54 Smart Minds P.B. Pg. 59	Class activities Class written tests Out of school/home assignments	
	2		multiplication of decimals by a decimal	By the end of the lesson the learner should be able to: a) multiply decimals by a decimal in real life situations. b) use IT devices for learning more on decimals and for enjoyment. c) Recognize use of decimals in real life situations.	1. Where are decimals applicable in real life? 2. How do you use decimals in daily activities?	The learner is guided to: • multiply decimals using cut outs, cards, charts and models • play games involving multiplication of decimals. • use calculators and other IT devices to work out operations of decimals.	Equivalent fraction board, Circular and Rectangular cut outs, Counters Smart Minds T.G. Pg. 54 Smart Minds P.B. Pg. 60	Class activities Class written tests Out of school/home assignments	

	3		<i>Division of decimals by a whole number</i>	By the end of the lesson the learner should be able to: a) divide decimals by a whole number in real life situations. b) use IT devices for learning more on decimals and for enjoyment. c) Recognize use of decimals in real life situations.	1. Where are decimals applicable in real life? 2. How do you use decimals in daily activities?	The learner is guided to: • divide decimals using cut outs, cards, charts and models • play games involving division of decimals. • use calculators and other IT devices to work out operations of decimals.	Equivalent fraction board, Circular and Rectangular cut outs, Counters <i>Smart Minds T.G. Pg. 55 Smart Minds P.B. Pg. 61-62</i>	Class activities Class written tests Out of school/home assignments	
--	---	--	--	---	---	---	--	---	--

	4		<i>Division of decimals by a decimal</i>	By the end of the lesson the learner should be able to: a) divide decimals by a decimal in real life situations b) use IT devices for learning more on decimals and for enjoyment. c) Recognize use of decimals in real life situations.	1. Where are decimals applicable in real life? 2. How do you use decimals in daily activities?	The learner is guided to: • divide decimals using cut outs, cards, charts and models • play games involving division of decimals. • use calculators and other IT devices to work out operations of decimals.	Equivalent fraction board, Circular and Rectangular cut outs, Counters <i>Smart Minds T.G. Pg. 55-56 Smart Minds P.B. Pg. 62-63</i>	Class activities Class written tests Out of school/home assignments	
	5	Squares and square roots	<i>Squares of whole numbers</i>	By the end of the lesson the learner should be able to: a) determine the squares of whole numbers by multiplication in different situations. b) use IT devices for learning more on squares and for enjoyment. c) Appreciate use of squares in real life situations.	How do we apply squares and square roots in daily activities?	The learner is guided to: • work out squares of numbers using: ✓ grids and charts ✓ long multiplication method ✓ using calculators • use IT devices to play games involving squares	Place value charts, Number cards <i>Smart Minds T.G. Pg. 57-58 Smart Minds P.B. Pg. 64-65</i>	Class written tests Class activities	

10	1		Squares of fractions	By the end of the lesson the learner should be able to: a) determine the squares of fractions by multiplication in different situations. b) use IT devices for learning more on squares and for enjoyment. c) Appreciate use of squares in real life situations.	Where do we apply squares and square roots in daily activities?	The learner is guided to: ● work out squares of numbers using: ✓ grids and charts ✓ long multiplication method ✓ using calculators ● use IT devices to play games involving squares	Place value charts, Number cards Smart Minds T.G. Pg. 58-59 Smart Minds P.B. Pg. 65-66	Class written tests Class activities	
	2		Squares of decimals	By the end of the lesson the learner should be able to: a) determine the squares of decimals by multiplication in different situations. b) use IT devices for learning more on squares and for enjoyment. c) Appreciate use of squares in real life situations.	Where do we apply squares and square roots in daily activities?	The learner is guided to: ● work out squares of numbers using: ✓ grids and charts ✓ long multiplication method ✓ using calculators ● use IT devices to play games involving squares	Place value charts, Number cards Smart Minds T.G. Pg. 59 Smart Minds P.B. Pg. 67	Class written tests Class activities	

	3		Square root of whole numbers and fractions	By the end of the lesson the learner should be able to: a) determine the square roots of whole numbers and fractions of perfect squares in different situations. b) use IT devices for learning more on square roots and for enjoyment. c) Appreciate use of square roots in real life situations.	Where do we apply squares and square roots in daily activities?	The learner is guided to: ● work out square roots of number using: ✓ factors method ✓ division method ✓ calculators ● use IT devices to play games involving square roots	Place value charts, Number cards Smart Minds T.G. Pg. 60 Smart Minds P.B. Pg. 68-70	Class written tests Class activities	
--	---	--	---	---	---	--	--	---	--

	4		<i>Square root of decimals</i>	By the end of the lesson the learner should be able to: a) determine the square roots of decimals of perfect squares in different situations. b) use IT devices for learning more on square roots and for enjoyment. c) Appreciate use of square roots in real life situations.	How do we apply squares and square roots in daily activities?	The learner is guided to: • work out square roots of number using: ✓ factors method ✓ division method ✓ calculators • use IT devices to play games involving square roots	Place value charts, Number cards <i>Smart Minds T.G. Pg. 61-63</i> <i>Smart Minds P.B. Pg. 70-71</i>	Class written tests Class activities	
	5	ALGEBRA	<i>Forming Algebraic expressions involving addition and subtraction</i>	By the end of the lesson the learner should be able to: a) form algebraic expressions from real life situations. b) use IT devices for more learning on algebraic expressions and for enjoyment, c) Appreciate use of algebraic expressions in real life.	How do we use algebraic expressions in daily activities?	The learner is guided to: • discuss and classify objects in their immediate environment according to given attributes such as similarities or differences • read and interpret algebraic statements to form algebraic expressions	Information from different sources <i>Smart Minds T.G. Pg. 64-65</i> <i>Smart Minds P.B. Pg. 72</i>	Class activities Class written tests Out of school/home assignments or activities	
11	1		<i>forming algebraic expressions involving multiplication and division</i>	By the end of the lesson the learner should be able to: a) form algebraic expressions from simple algebraic statements in real life situations. b) use IT devices for more learning on algebraic expressions and for enjoyment, c) Appreciate use of algebraic expressions in real life.	How do we use algebraic expressions in daily activities?	The learner is guided to: • discuss how to form algebraic expressions from the classified objects • read and interpret algebraic statements to form algebraic expressions	Information from different sources <i>Smart Minds T.G. Pg. 65</i> <i>Smart Minds P.B. Pg. 73</i>	Class activities Class written tests Out of school/home assignments or activities	

2		simplifying algebraic expressions involving addition and subtraction	By the end of the lesson the learner should be able to: a) simplify algebraic expressions in real life situations b) use IT devices for more learning on algebraic expressions and for enjoyment, c) Appreciate use of algebraic expressions in real life.	How do we use algebraic expressions in daily activities?	The learner is guided to: • discuss how to simplify algebraic expressions from the classified objects • use IT to work out exercises and activities in algebra or drag and drop activities to group similar objects	Information from different sources Smart Minds T.G. Pg. 65-66 Smart Minds P.B. Pg. 74-75	Class activities Class written tests Out of school/home assignments or activities	
3		simplifying algebraic expressions involving multiplication and division	By the end of the lesson the learner should be able to: a) simplify algebraic expressions in real life situations b) Drag and drop to group similar objects c) Appreciate use of algebraic expressions in real life.	How do we use algebraic expressions in daily activities?	The learner is guided to: • discuss how to simplify algebraic expressions from the classified objects • use IT to work out exercises and activities in algebra or drag and drop activities to group similar objects	Information from different sources Smart Minds T.G. Pg. 66-67 Smart Minds P.B. Pg. 75-76	Class activities Class written tests Out of school/home assignments or activities	
4		simplifying algebraic expressions involving multiplication and division	By the end of the lesson the learner should be able to: a) simplify algebraic expressions in real life situations b) Drag and drop to group similar objects c) Appreciate use of algebraic expressions in real life.	How do we use algebraic expressions in daily activities?	The learner is guided to: • discuss how to simplify algebraic expressions from the classified objects • use IT to work out exercises and activities in algebra or drag and drop activities to group similar objects	Information from different sources Smart Minds T.G. Pg. 66-67 Smart Minds P.B. Pg. 75-76	Class activities Class written tests Out of school/home assignments or activities	

	5	Linear Equations	<i>forming linear equations involving addition and subtraction</i>	By the end of the lesson the learner should be able to: a) form linear equations in one unknown in different situations b) role play activities involving equations with one unknown c) Reflect on use of linear equations in real life situations.	1. How do we use linear equations in real life? 2. Why do we use linear equations in real life?	The learner is guided to: ● discuss how to form linear equations generated from role play activities ● role play activities involving equations with one unknown for example weighing using beam balance and shopping activities	Information from different sources <i>Smart Minds T.G. Pg. 68-69</i> <i>Smart Minds P.B. Pg. 77-78</i>	Class activities Class written tests Out of school/home assignments or activities	

12	1		<i>forming linear equations involving addition and subtraction</i>	By the end of the lesson the learner should be able to: a) form linear equations in one unknown in different situations b) role play activities involving equations with one unknown. c) Reflect on use of linear equations in real life situations.	1. How do we use linear equations in real life? 2. Why do we use linear equations in real life?	The learner is guided to: ● discuss how to form linear equations generated from role play activities ● role play activities involving equations with one unknown for example weighing using beam balance and shopping activities	Information from different sources <i>Smart Minds T.G. Pg. 68-69</i> <i>Smart Minds P.B. Pg. 77-78</i>	Class activities Class written tests Out of school/home assignments or activities	
	2		<i>Forming linear equations involving Multiplication and division</i>	By the end of the lesson the learner should be able to: a) form linear equations in one unknown in different situations b) role play activities involving equations with one unknown c) Reflect on use of linear equations in real life situations.	1. How do we use linear equations in real life? 2. Why do we use linear equations in real life?	The learner is guided to: ● discuss how to form linear equations generated from role play activities ● role play activities involving equations with one unknown for example weighing using beam balance and shopping	Information from different sources <i>Smart Minds T.G. Pg. 69</i> <i>Smart Minds P.B. Pg. 78</i>	Class activities Class written tests Out of school/home assignments or activities	

	5		<i>solving linear equations involving multiplication and addition</i>	By the end of the lesson the learner should be able to: a) Discuss how to solve linear equations from role play activities. b) apply linear equations in one unknown to real life situations. c) Reflect on use of linear equations in real life situations	1. How do we use linear equations in real life? 2. Why do we use linear equations in real life?	The learner is guided to: ● discuss how solve linear equations generated from role play activities ● use IT to form and solve linear equations.	Information from different sources <i>Smart Minds T.G. Pg. 70-71</i> <i>Smart Minds P.B. Pg. 80</i>	Class activities Class written tests Out of school/home assignments or activities
